Ms. Dani Regular Program

Antiga Village Nursing program with GFF

Regular Visit and Monthly Support for Our Special Senior

As part of our ongoing commitment to supporting the well-being of our special seniors, we conduct regular monthly visits to ensure they receive the care and supplies they need. During our most recent visit, we provided Ms. Dani with a month's worth of essential supplies, tailored to her needs to help her maintain a comfortable and healthy lifestyle. In addition to delivering these supplies, we initiated a special trial of the GFF program under the guidance of Doctor Budi.

The goal of this trial is to enhance Ms. Dani's quality of life, promote independence, and support her overall health in a sustainable and manageable way.

The visit not only provided much-needed physical support but also allowed us to spend quality time with Ms. Dani, ensuring she felt seen, valued, and cared for. These regular visits serve as an opportunity to monitor her health, identify any additional needs, and reinforce the importance of community care and compassion.

Each time we visit her at Antiga, we make it a priority to monitor her progress with the GFF program. By observing her improvements firsthand and consulting with Doctor Budi, we can adjust the exercises as needed to ensure they remain effective and suitable for her current health condition. These regular progress checks not only allow us to evaluate the impact of the program but also demonstrate our ongoing commitment to her well-being and quality of life.

Through these visits, we aim to provide not just physical support but also emotional encouragement, reminding Ms. Dani that she is cared for and that her health is a priority to us. The combination of consistent monthly supplies and the modified GFF program ensures that she receives the holistic care she deserves while maintaining a sense of connection and community.

We also arranged for dental implants, which were carefully designed to restore his smile and give him a natural, flawless appearance. This comprehensive treatment not only repaired the physical damage but also helped Genis regain his self-assurance and smile with confidence once again.
